I'm glad there is a better way. I am in investigation and I hope to document him later. Click: Click: Next I accept license agreement: selected click: Next: License button Click: Next: Next: Next to click: Next System name (aka Name Host CMS) Enter the password of the administrator Account Click : Next: Säo personally I prefer to select the installation without configuration. Cié allows the installation to work without trying to do too much and perhaps fail. We will help the creation of a repository and the configuration of the working server after installation. Click: Next Skip configuration: selected it is recommended to perform the data service as a service account so that the working server can read/write in the positions of the FIR request network files. This is something that can be done later. Select Use the system account or enter the credentials of your service account. Click: Click Next Click Click Click: Click Finish: SI (when possible) screenshot post the installation here are some post-installation screens. Central Management Console (CMC) - where you create and manage the rights of repository questions they hope it was useful to it. Thanks! Sap Data Services 4.2 and Sap Information Steward 4.2 entered increasing on May 13, 2013 as a general availability for a planned 6-month duration. As expected, both were released to the customer on December 6, 2013. The final products ready for download are: SAP Data Services 4.2 SP01 (14.2.1.0) Sap Information Steward 4.2 SP01 (14.2.1.0) Note: SAP has adopted the same approach With SAP Bi 4.1 released at the beginning of this year while they entered ramps with SAP Bi 4.1 SP00 and was officially released with SAP Bi 4.1 SP01. The software can be downloaded as o COMPLETE UPDATE: SAP DATA SERVICES 4.2 SP01 Download software> installations and updates> a ä e ä ~ ä e öZ Index> D> SAP Data Services> Services> Data Services 4.2 Microsoft Windows: Linux: SAP Information Steward 4.2 SP01 Download Software> Installations and updates> A ä e ä ~ ä e öZ Index> l> sap information stewards> SAP Switcerd 4.2 Microsoft Windows: ä e Linux: myself and I am sure many of you had been waiting for this version for some time. I am sure of one or both the following reasons; you can (finally) patch of your bi sap 4.0 environment! Customers with implementations such as SAP Bi 4.0 or IPS 4.0 and SAP DS 4.1 were left incapable of patch bi in SAP Bi 4.1 (SP01 or SP02) when it was released a few months ago. This is obviously because of the notorious "compatibility matrix". Note SAP 1740516. Note: I tester the most early on my test and contact my customers in January for a series of long and expected Bi and Bi and expected DS (IS) updates !! See my installation notes: how to install SAP Data Services 4.2 ä e ä ~ ä e öZ Parte 1: Install SAP Data Services 4.2 ä e ävelop ä e ö Part 2: (in progress) SAP Information Steward 4.2 SP01 [NEXT] Here are some useful documents: SAP Data Services 4.2 SP01: Sa Help Portal: SAP Data Services 4.2 ä e ävelop ä e ö What is new: . Com/Docs/DOC-41440 SAP Information Steward 4.2 SP01 SALP HELP Portal: SAP INFORMATION Steward 4.2 ä e ävelop ä e öThe page of the help portal SAP continuous I will add content here while I learn more. Main attention is the BI platform, so this always be tied to architecture. I let people skilled very much more than me managed with the new functionalities of those products! See other blogs and articles here: BI platform, management of company information, data services and data quality, Sap Information Steward. As always, I am happy to listen to your comments, suggestions and experiences with these versions. Thanks! Thanks!
